Marlene H. Dortch
Secretary of the
Federal Communications Commission

Dear Ms. Dortch,

Please accept my comments regarding any changes in the regulation of cell towers. I respectfully submit my comments as follows: Our entire action group of concerned citizens protecting the environment against detrimental effects of cell towers believe that cell towers should not be constructed in Forest Preserves; Wildlife Preserves; ecologically sensitive watersheds; or other protected habitats for wildlife. We believe that our forest preserves are a sanctuary for migratory birds and other species and cell towers will severely threaten their existence.

Please, restrict cell towers from being built in or near our Forest Preserves and other sanctuaries for birds and other wildlife.

Sincerely,

Meryl Cannon
